

## Supplementary Material

### Contents

List of Tables .....	2
List of Figures .....	6
1 Additional Clarification on the Derivation of Secondary Endpoints.....	10
2 Additional Tables and Figures from the Main Trial Analysis .....	15
2.1 Participant Flow.....	15
2.2 Baseline Characteristics.....	32
2.3 Treatment Received .....	52
2.4 Overall Survival.....	56
2.5 QALYs.....	70
2.6 Secondary Time to Event Analysis .....	109
2.7 Additional Information on the Secondary QoL Analysis .....	117
2.8 Ancillary Analysis of Overall Survival .....	143
2.9 Ancillary Analysis of QALYs .....	148
2.10 Ancillary Analysis of Secondary Endpoints.....	163
2.11 Harms.....	193

## List of Tables

Supplementary Table 1: Non-Mutually Exclusive Reasons for Participants Discontinuing Trial Treatment, by Randomisation Allocation (G5_ParticipantFlow) .....	15
Supplementary Table 2: Other Reasons for Participants Discontinuing Trial Treatment, by Randomisation Allocation (G5_ParticipantFlow) .....	17
Supplementary Table 3: The Number of Expected Questionnaire Booklets (Number Returned, Percent Returned) at each Timepoint by Randomisation Allocation (G5_ParticipantFlow) .....	18
Supplementary Table 4: Withdrawal Information, by Randomisation Allocation (G5_ParticipantFlow) .....	23
Supplementary Table 5: Reasons for Participant Withdrawal, by Randomisation Allocation (G5_ParticipantFlow) .....	26
Supplementary Table 6:: Protocol Violations / Deviations, by Randomisation Allocation (G5_ParticipantFlow) .....	29
Supplementary Table 7: Eligibility Criteria Breached, by Randomisation Allocation (G5_ParticipantFlow) .....	30
Supplementary Table 8: Key Demographic and Disease Related Characteristics, by Randomisation Allocation Received, in the Safety population (G6_BaselineCharacteristics)	32
Supplementary Table 9: Key Demographic and Disease Related Characteristics, by Randomisation Allocation, in the EQ5D QoL population (G6_BaselineCharacteristics).....	35
Supplementary Table 10: Key Demographic and Disease Related Characteristics, by Randomisation Allocation, in the FKSI QoL population (G6_BaselineCharacteristics) .....	39
Supplementary Table 11: Key Demographic and Disease Related Characteristics, by Randomisation Allocation, in the FACT-G QoL population (G6_BaselineCharacteristics) ..	42
Supplementary Table 12: Key Demographic and Disease Related Characteristics, by (Randomised Under) TKI Received, in the ITT population (G6_BaselineCharacteristics) ....	46
Supplementary Table 13: Key Demographic and Disease Related Characteristics, by (Randomised Under) TKI Received, in the PP population (G6_BaselineCharacteristics).....	49
Supplementary Table 14: Post-Trial Treatment, by TKI received, in the ITT population (G8_TreatmentReceived).....	52
Supplementary Table 15: Anti-Cancer therapy received in follow-up, by Randomisation Allocation, in the ITT population - non mutually exclusive (G8_TreatmentReceived).....	53
Supplementary Table 16: Other anti-Cancer therapy received in follow-up, by randomisation allocation, in the ITT population - Not mutually exclusive (G8_TreatmentReceived).....	54
Supplementary Table 17: Number of Distinct Anti-Cancer Treatment Types, by Randomisation Allocation, in the ITT population (G8_TreatmentReceived) .....	55
Supplementary Table 18: Other Causes of Death Reported, by Randomisation Allocation, in the PP Population (P1b_OSPrimaryAnalysis) .....	56
Supplementary Table 19: Mutually Exclusive Causes of Death, by TKI, in the PP Population (P1b_OSPrimaryAnalysis).....	58
Supplementary Table 20: Other Causes of Death Reported, by TKI, in the PP Population (P1b_OSPrimaryAnalysis).....	59
Supplementary Table 21: Other Causes of Death Reported, by Randomisation Allocation, in the ITT Population (P1c_OSSensitivityAnalysis_ITT) .....	62
Supplementary Table 22: Mutually Exclusive Causes of Death, by TKI, in the ITT Population (P1c_OSSensitivityAnalysis_ITT) .....	66
Supplementary Table 23: Other Causes of Death Reported, by TKI, in the ITT Population (P1c_OSSensitivityAnalysis_ITT) .....	66

Supplementary Table 24: Key baseline characteristics, by baseline questionnaire missing status, in the ITT population (P2b_EQ5D_PrimaryImputation).....	70
Supplementary Table 25: Key baseline characteristics and variables considered for the imputation model, by 6 months follow-up questionnaire missing status, in the ITT population (P2b_EQ5D_PrimaryImputation).....	72
Supplementary Table 26: Key baseline characteristics and variables considered for the imputation model, by 18 months follow-up questionnaire missing status, in the ITT population (P2b_EQ5D_PrimaryImputation).....	75
Supplementary Table 27: Key baseline characteristics and variables considered for the imputation model, by 30 months follow-up questionnaire missing status, in the ITT population (P2b_EQ5D_PrimaryImputation).....	79
Supplementary Table 28: Key baseline characteristics and variables considered for the imputation model, by 42 months follow-up questionnaire missing status, in the ITT population (P2b_EQ5D_PrimaryImputation).....	83
<i>Supplementary Table 29: Key baseline characteristics and variables considered for the imputation model, by 54 months follow-up questionnaire missing status, in the ITT population (P2b_EQ5D_PrimaryImputation).....</i>	<i>86</i>
Supplementary Table 30: Key baseline characteristics and variables considered for the imputation model, by 66 months follow-up questionnaire missing status, in the ITT population (P2b_EQ5D_PrimaryImputation).....	90
Supplementary Table 31: Key baseline characteristics and variables considered for the imputation model, by 78 months follow-up questionnaire missing status, in the ITT population (P2b_EQ5D_PrimaryImputation).....	93
Supplementary Table 32: Piecewise Hazards Model Results for Time to Treatment Failure in the ITT population - 2 Intervals (S2a_TTF).....	109
Supplementary Table 33: Piecewise Hazards Model Results for Time to Treatment Failure in the ITT population - 3 Intervals (S2a_TTF).....	110
Supplementary Table 34: Piecewise Hazards Model Results for Progression-Free Survival in the ITT population - 2 Intervals (S3_PFS).....	113
Supplementary Table 35: Piecewise Hazards Model Results for Progression-Free Survival in the ITT population - 3 Intervals (S3_PFS).....	115
Supplementary Table 36: Results of mixed modelling for the FKIS-DRS score, only including timepoints where both strategies have results (Week 312) (S6_FKSI15).....	119
Supplementary Table 37: Results of mixed modelling for the FACT-G Physical Well-Being Subscale, only including timepoints were both strategies have results (S7_FACTG).....	129
Supplementary Table 38: Results of mixed modelling for the FACT-G Social/Family Well-Being Subscale, only including timepoints were both strategies have results (S7_FACTG)	131
Supplementary Table 39: Results of mixed modelling for the FACT-G Emotional Well-Being Subscale, only including timepoints were both strategies have results (S7_FACTG).....	133
Supplementary Table 40: Results of mixed modelling for the FACT-G Functional Well-Being Subscale, only including timepoints were both strategies have results (S7_FACTG)	135
Supplementary Table 41: Piecewise Hazards Model Results for Overall Survival in the PP population (P1d_OS_SensitivityAnalysis_Piecewise).....	143
Supplementary Table 42: Cox Regression Analysis Results for Overall Survival in the PP Population (P1f_OS_SensitivityAnalysis_CombMot).....	145
Supplementary Table 43: Cox Regression Analysis Results for Overall Survival in the ITT Population (P1f_OS_SensitivityAnalysis_CombMot).....	146
Supplementary Table 44: Combined Marginal Effects of the Finite Mixture Model with Two Components for QALYs, from Week 24, in the PP population (P2e_QALYs_SensitivityAnalysis_24w).....	148

Supplementary Table 45: Combined Marginal Effects of the Finite Mixture Model with Two Components for QALYs, up to 12 months post-randomisation, in the PP population (P2g_QALYs_SensitivityAnalysis_12m).....	151
Supplementary Table 46: Combined Marginal Effects of the Finite Mixture Model with Two Components for QALYs, up to 24 months post-randomisation, in the PP population (P2h_QALYs_SensitivityAnalysis_24m).....	153
Supplementary Table 47: Combined Marginal Effects of the Finite Mixture Model with Two Components for QALYs, up to 36 months post-randomisation, in the PP population (P2f_QALYs_SensitivityAnalysis_36m) .....	155
Supplementary Table 48: Combined Multivariate Linear Regression Results for QALYs in the PP population (P2i_QALYs_SensitivityAnalysis_Linear).....	157
Supplementary Table 49: Marginal Model results for a finite mixture model with two components for QALYs over the lifetime of the trial - complete case data (P2j_QALYs_SensitivityAnalysis_Complete) .....	159
Supplementary Table 50: Combined Marginal Effects of the Finite Mixture Model with Two Components for QALYs, over trial and follow-up, in the PP population - MNAR Scenario 1 (P2l_EQ5D_SensitivityImputation_WorstCase) .....	161
Supplementary Table 51: Cox Regression Analysis Results for Time To Treatment Failure in the ITT population - Accounting for Treatment Breaks (S2b_TTF_Sensitivity).....	164
Supplementary Table 52: Results of mixed modelling for the FKSI total score, measured up to 12 months post-randomisation (Week 54) (S6_FKSI15) .....	166
Supplementary Table 53: Results of mixed modelling for the FKIS-DRS score, measured up to 12 months post-randomisation (Week 54) (S6_FKSI15) .....	167
Supplementary Table 54: Results of mixed modelling for the FKSI total score, measured up to 24 months post-randomisation (Week 102) (S6_FKSI15) .....	170
Supplementary Table 55: Results of mixed modelling for the FKIS-DRS score, measured up to 24 months post-randomisation (Week 102) (S6_FKSI15) .....	172
Supplementary Table 56: Results of mixed modelling for the FKSI total score, measured up to 36 months post-randomisation (Week 156) (S6_FKSI15) .....	174
Supplementary Table 57: Results of mixed modelling for the FKIS-DRS score, measured up to 36 months post-randomisation (Week 156) (S6_FKSI15) .....	176
Supplementary Table 58: Results of mixed modelling for the FACT-G total score, measured up to 12 months post-randomisation (Week 54) (S7_FACTG).....	178
Supplementary Table 59: Results of mixed modelling for the FACT-G Physical Well-Being Subscale, measured up to 12 months post-randomisation (Week 54) (S7_FACTG) .....	179
Supplementary Table 60: Results of mixed modelling for the FACT-G Social/Family Well-Being Subscale, measured up to 12 months post-randomisation (Week 54) (S7_FACTG)..	180
Supplementary Table 61: Results of mixed modelling for the FACT-G Emotional Well-Being Subscale, measured up to 12 months post-randomisation (Week 54) (S7_FACTG) .....	181
Supplementary Table 62: Results of mixed modelling for the FACT-G Functional Well-Being Subscale, measured up to 12 months post-randomisation (Week 54) (S7_FACTG)..	182
Supplementary Table 63: Results of mixed modelling for the FACT-G total score, measured up to 24 months post-randomisation (Week 102) (S7_FACTG).....	183
Supplementary Table 64: Results of mixed modelling for the FACT-G Physical Well-Being Subscale, measured up to 24 months post-randomisation (Week 102) (S7_FACTG) .....	184
Supplementary Table 65: Results of mixed modelling for the FACT-G Social/Family Well-Being Subscale, measured up to 24 months post-randomisation (Week 102) (S7_FACTG)	185
Supplementary Table 66: Results of mixed modelling for the FACT-G Emotional Well-Being Subscale, measured up to 24 months post-randomisation (Week 102) (S7_FACTG) .....	186

Supplementary Table 67: Results of mixed modelling for the FACT-G Functional Well-Being Subscale , measured up to 24 months post-randomisation (Week 102) (S7_FACTG)	187
Supplementary Table 68: Results of mixed modelling for the FACT-G total score, measured up to 36 months post-randomisation (Week 156) (S7_FACTG)	188
Supplementary Table 69: Results of mixed modelling for the FACT-G Physical Well-Being Subscale, measured up to 36 months post-randomisation (Week 156) (S7_FACTG)	189
Supplementary Table 70: Results of mixed modelling for the FACT-G Social/Family Well-Being Subscale, measured up to 36 months post-randomisation (Week 156)(S7_FACTG)	190
Supplementary Table 71: Results of mixed modelling for the FACT-G Emotional Well-Being Subscale, measured up to 36 months post-randomisation (Week 156) (S7_FACTG)	191
Supplementary Table 72: Results of mixed modelling for the FACT-G Functional Well-Being Subscale, measured up to 36 months post-randomisation (Week 156) (S7_FACTG)	192
Supplementary Table 73: Number of participants experiencing each type of AE (S5a_Toxicity_AEs)	193
Supplementary Table 74: Maximum CTCAE grade experienced per participant for each type of AE (S5a_Toxicity_AEs)	203
Supplementary Table 75: Other AEs categorised by grade (S5a_Toxicity_AEs)	221
Supplementary Table 76: Other AEs with grade 3 or above by CTCAE term (S5a_Toxicity_AEs)	223
Supplementary Table 77: Line-Listing of Other AEs (Grade 3 or above) with no CTCAE recoding, by treatment (S5a_Toxicity_AEs)	238
Supplementary Table 80: SAE by CTCAE grade (S5b_Toxicity_SAEs)	239
Supplementary Table 81: SAR by CTCAE grade (S5c_Toxicity_SARs)	241
Supplementary Table 82: SAE by MedDRA (S5b_Toxicity_SAEs)	243
Supplementary Table 83: SAR by MedDRA (S5c_Toxicity_SARs)	246
Supplementary Table 78: Outcome of SAEs (S5b_Toxicity_SAEs)	248
Supplementary Table 79: Outcome of SARs (S5c_Toxicity_SARs)	249
Supplementary Table 84: SAE seriousness criteria – non-mutually exclusive (S5b_Toxicity_SAEs)	251
Supplementary Table 85: SAR Seriousness criteria – non-mutually exclusive (S5c_Toxicity_SARs)	253
Supplementary Table 86: Line Listing of all SUSARs (S5e_Toxicity_LineListings)	255
Supplementary Table 87: Line Listing of all SUSARs (S5e_Toxicity_LineListings) cont.	259
Supplementary Table 88: Line Listing of all SUSARs (S5e_Toxicity_LineListings) cont.	262
Supplementary Table 89: Confirmed cases of Osteonecrosis of the Jaw (S5g_ONJ)	265
Supplementary Table 90: Confirmed cases of Osteonecrosis of the Jaw (S5g_ONJ) cont.	266

## List of Figures

Supplementary Figure 1: Flowchart of the derivation of Time to Strategy Failure.....	10
Supplementary Figure 2: Flowchart of the derivation of Time to Treatment Failure .....	11
Supplementary Figure 3: Flowchart of the derivation of Progression-Free Survival.....	12
Supplementary Figure 4: Flowchart of the derivation of Summative Progression-Free Interval in the CCS Arm.....	13
Supplementary Figure 5: Flow-chart of the derivation of Summative Progression-Free Interval in the DFIS Arm .....	14
Supplementary Figure 6: Withdrawal Data Collection on STAR .....	25
Supplementary Figure 7: Histogram of the EQ-5D Utility Index at 6-months follow (P2b_EQ5D_PrimaryImputation).....	98
Supplementary Figure 8: QQ-Plot of the EQ-5D Utility Index at 6-months follow (P2b_EQ5D_PrimaryImputation).....	98
Supplementary Figure 9: Histogram of the EQ-5D Utility Index at 18-months follow (P2b_EQ5D_PrimaryImputation).....	99
Supplementary Figure 10: QQ-Plot of the EQ-5D Utility Index at 18-months follow (P2b_EQ5D_PrimaryImputation).....	99
Supplementary Figure 11: Histogram of the EQ-5D Utility Index at 30-months follow (P2b_EQ5D_PrimaryImputation).....	100
Supplementary Figure 12: QQ-Plot of the EQ-5D Utility Index at 30-months follow (P2b_EQ5D_PrimaryImputation).....	100
Supplementary Figure 13: Histogram of the EQ-5D Utility Index at 42-months follow (P2b_EQ5D_PrimaryImputation).....	101
Supplementary Figure 14: QQ-Plot of the EQ-5D Utility Index at 42-months follow (P2b_EQ5D_PrimaryImputation).....	101
Supplementary Figure 15: Histogram of the EQ-5D Utility Index at 54-months follow (P2b_EQ5D_PrimaryImputation).....	102
Supplementary Figure 16: QQ-Plot of the EQ-5D Utility Index at 54-months follow (P2b_EQ5D_PrimaryImputation).....	102
Supplementary Figure 17: Histogram of the EQ-5D Utility Index at 66-months follow (P2b_EQ5D_PrimaryImputation).....	103
Supplementary Figure 18: QQ-Plot of the EQ-5D Utility Index at 66-months follow (P2b_EQ5D_PrimaryImputation).....	103
Supplementary Figure 19: Histogram of the EQ-5D Utility Index at 78-months follow (P2b_EQ5D_PrimaryImputation).....	104
Supplementary Figure 20: QQ-Plot of the EQ-5D Utility Index at 78-months follow (P2b_EQ5D_PrimaryImputation).....	104
Supplementary Figure 21: Trace Plot for the imputation of EQ-5D utility score at 6 months follow-up across N Imputations (P2b_EQ5D_PrimaryImputation).....	105
Supplementary Figure 22: Trace Plot for the imputation of EQ-5D utility score at 18 months follow-up across N Imputations (P2b_EQ5D_PrimaryImputation).....	105
Supplementary Figure 23: Trace Plot for the imputation of EQ-5D utility score at 30 months follow-up across N Imputations (P2b_EQ5D_PrimaryImputation).....	106
Supplementary Figure 24: Trace Plot for the imputation of EQ-5D utility score at 42 months follow-up across N Imputations (P2b_EQ5D_PrimaryImputation).....	106
Supplementary Figure 25: Finite Mixture Model Diagnostics - QALYs Primary Analysis – (A) Histogram of Residuals (P2c_QALYs_PrimaryAnalysis).....	106
Supplementary Figure 26: Finite Mixture Model Diagnostics - QALYs Primary Analysis – (B) QQ-Plot of Residuals (P2c_QALYs_PrimaryAnalysis).....	107

Supplementary Figure 27: Finite Mixture Model Diagnostics - QALYs Primary Analysis – (C) Plot of Predicted Values and Residuals (P2c_QALYs_PrimaryAnalysis).....	107
Supplementary Figure 28: Finite Mixture Model Diagnostics - QALY ITT Sensitivity Analysis – (A) Histogram of Residuals (P2d_QALYs_SensitivityAnalysis_ITT) .....	107
Supplementary Figure 29: Finite Mixture Model Diagnostics - QALY ITT Sensitivity Analysis – (B) QQ Plot of Residuals (P2d_QALYs_SensitivityAnalysis_ITT) .....	108
Supplementary Figure 30: Finite Mixture Model Diagnostics - QALY ITT Sensitivity Analysis – (C) Plot of Predicted Values and Residuals (P2d_QALYs_SensitivityAnalysis_ITT).....	108
Supplementary Figure 31: FSKI-DRS Subscale Score Summary Statistics, Median and Interquartile Range, by Randomisation Allocation – (A) Booklets A, B and C.....	117
Supplementary Figure 32: FSKI-DRS Subscale Score Summary Statistics, Median and Interquartile Range, by Randomisation Allocation – (B) Booklet E.....	118
Supplementary Figure 33: FACT-G Social/Family Well-Being Subscale Summary Statistics, Median and Interquartile Range, by Randomisation Allocation - (A) Booklets A, B and C	121
Supplementary Figure 34: FACT-G Social/Family Well-Being Subscale Summary Statistics, Median and Interquartile Range, by Randomisation Allocation - (B) Booklet E.....	122
Supplementary Figure 35: FACT-G Physical Well-Being Subscale Summary Statistics, Median and Interquartile Range, by Randomisation Allocation - (A) Booklets A, B and C	123
Supplementary Figure 36: FACT-G Physical Well-Being Subscale Summary Statistics, Median and Interquartile Range, by Randomisation Allocation - (B) Booklet E.....	124
Supplementary Figure 37: FACT-G Emotional Well-Being Subscale Summary Statistics, Median and Interquartile Range, by Randomisation Allocation - (A) Booklets A, B and C	125
Supplementary Figure 38: FACT-G Emotional Well-Being Subscale Summary Statistics, Median and Interquartile Range, by Randomisation Allocation - (B) Booklet E.....	126
Supplementary Figure 39: FACT-G Functional Well-being Subscale Summary Statistics, Median and Interquartile Range, by Randomisation Allocation - (A) Booklets A, B and C	127
Supplementary Figure 40: FACT-G Functional Well-being Subscale Summary Statistics, Median and Interquartile Range, by Randomisation Allocation - (B) Booklet E.....	128
Supplementary Figure 41: EQ-5D-3L Utility Index Summary Statistics, Median and Interquartile Range, by Randomisation Allocation – (A) Booklets A, B and D .....	137
Supplementary Figure 42: EQ-5D-3L Utility Index Summary Statistics, Median and Interquartile Range, by Randomisation Allocation – (B) Booklet E.....	138
Supplementary Figure 43: EQ-5D-3L Utility Index Summary Statistics, Median and Interquartile Range, by Randomisation Allocation – (A) Booklet F.....	139

## 2 Additional Tables and Figures from the Main Trial Analysis

### 2.1 Participant Flow

*Supplementary Table 1: Non-Mutually Exclusive Reasons for Participants Discontinuing Trial Treatment, by Randomisation Allocation (G5\_ParticipantFlow)*

	<b>Conventional Continuation Strategy (CCS)</b>	<b>Drug-Free Interval Strategy (DFIS)</b>	<b>Total</b>
<b>Reason(s) for treatment discontinuation</b>			
Clinician-led withdrawal from study	14 (2.7%)	34 (6.5%)	48 (4.6%)
Death	12 (2.3%)	31 (6.0%)	43 (4.1%)
Disease progression (Clinical (non radiological))	24 (4.6%)	49 (9.4%)	73 (7.0%)
Disease progression (Radiological)	253 (48.4%)	203 (39.0%)	456 (43.7%)
Medical Reasons (non-toxicity related)	36 (6.9%)	20 (3.8%)	56 (5.4%)
Other	18 (3.4%)	18 (3.5%)	36 (3.5%)
Radiotherapy	5 (1.0%)	5 (1.0%)	10 (1.0%)
Surgery	9 (1.7%)	2 (0.4%)	11 (1.1%)
Toxicity	140 (26.8%)	135 (26.0%)	275 (26.4%)
Withdrawal from study	12 (2.3%)	23 (4.4%)	35 (3.4%)
Total	523 (100%)	520 (100%)	1043 (100%)
<b>Reason(s) for treatment discontinuation: Prior to Week 24</b>			
Clinician-led withdrawal from study	5 (2.0%)	9 (3.7%)	14 (2.8%)
Death	10 (4.0%)	9 (3.7%)	19 (3.8%)
Disease progression (Clinical (non radiological))	11 (4.3%)	16 (6.5%)	27 (5.4%)
Disease progression (Radiological)	89 (35.2%)	91 (37.1%)	180 (36.1%)

	<b>Conventional Continuation Strategy (CCS)</b>	<b>Drug-Free Interval Strategy (DFIS)</b>	<b>Total</b>
Medical Reasons (non-toxicity related)	16 (6.3%)	9 (3.7%)	25 (5.0%)
Other	7 (2.8%)	4 (1.6%)	11 (2.2%)
Radiotherapy	3 (1.2%)	2 (0.8%)	5 (1.0%)
Surgery	6 (2.4%)	0 (0.0%)	6 (1.2%)
Toxicity	100 (39.5%)	97 (39.6%)	197 (39.6%)
Withdrawal from study	6 (2.4%)	8 (3.3%)	14 (2.8%)
<b>Total</b>	<b>253 (100%)</b>	<b>245 (100%)</b>	<b>498 (100%)</b>
<b>Reason(s) for treatment discontinuation: Post Week 24</b>			
Clinician-led withdrawal from study	9 (3.3%)	25 (9.1%)	34 (6.2%)
Death	2 (0.7%)	22 (8.0%)	24 (4.4%)
Disease progression (Clinical (non radiological))	13 (4.8%)	33 (12.0%)	46 (8.4%)
Disease progression (Radiological)	164 (60.7%)	112 (40.7%)	276 (50.6%)
Medical Reasons (non-toxicity related)	20 (7.4%)	11 (4.0%)	31 (5.7%)
Other	11 (4.1%)	14 (5.1%)	25 (4.6%)
Radiotherapy	2 (0.7%)	3 (1.1%)	5 (0.9%)
Surgery	3 (1.1%)	2 (0.7%)	5 (0.9%)
Toxicity	40 (14.8%)	38 (13.8%)	78 (14.3%)
Withdrawal from study	6 (2.2%)	15 (5.5%)	21 (3.9%)
<b>Total</b>	<b>270 (100%)</b>	<b>275 (100%)</b>	<b>545 (100%)</b>

*Note, the number in the total row refers to the number of reasons*

Supplementary Table 2: Other Reasons for Participants Discontinuing Trial Treatment, by Randomisation Allocation (G5\_ParticipantFlow)

<b>Conventional Continuation Strategy (CCS)</b>	<b>Prior to Week 24?</b>	<b>Drug-Free Interval Strategy (DFIS)</b>	<b>Prior to Week 24?</b>
Assessment by colorectal surgeon as to the appropriateness of conservative over surgical mangement	No	Acute Pancreatitis complicated by acute Ischemic colitis	Yes
Brain metastasis	Yes	Change of treatment	No
Clinician and Patient choice - regime changed to 2 wks on 1 wk off. Star emailed.	Yes	Clinician did not feel it was appropriate to restart trial despite the pp having disease progression	No
Delay due to teeth extraction	No	Decrease in performance status. No longer fit for trial treatment.	Yes
General Frailty	No	Due to large number of CT scans pt had. In light of excellent response and continued good health	No
Initially considered DP due to original SLD total which changed following a corrected measurement	No	Due treatment break but now not clinically appropriate for any further breaks	No
MDT decision due to unequivocal progression in liver	Yes	Extended time off drug due to pt choice	No
Mets from 2nd primary - biopsy proven	No	Increase NT lesions	No
Patient finding travel too much. Patient decision	No	Lost to follow-up	Yes
Patient moved country	No	NOT suitable to continue on trial pathway	No
Patient needed dose escalation and also wanted home delivery	Yes	Patient choice	No

<b>Conventional Continuation Strategy (CCS)</b>	<b>Prior to Week 24?</b>	<b>Drug-Free Interval Strategy (DFIS)</b>	<b>Prior to Week 24?</b>
Patient wanted to stop Pazopanib for trip abroad without side effects	Yes	Patient had TIA so to remain off Sunitinib at the moment ? Change to different treatment at next apt	No
Protocol violation	Yes	Patient moving country	No
Pthas been off sun too long. To continue off study. Due to SAE relating to left thigh haematoma	No	Patient preference	No
Toxicity due to poor wound healing on TKI	No	Patients condition deteriorated following randomisation and therefore treatment was not commenced.	Yes
Transferring to 2 weeks on 1 week off regime	No	Treatment break continued after progression for > 28 days	No
patient compliance	Yes	mixed response and bothersome toxicities	No
time elapsed off treatment greater than 28 days	No	treatment delay > 28 days (3 months)	No

*Note one patient withdrew from treatment and quality of life and then withdrew from follow-up at a later time point, the numbers in the heading refer to the number of patients considered whereas the number in the total row relates to the number of reasons. Note, these are presented as N (%) for each category, where % is calculated out of the total number of occurrences.*

Supplementary Figure 6: Withdrawal Data Collection on STAR

Supplementary Table 5: Reasons for Participant Withdrawal, by Randomisation Allocation (G5\_ParticipantFlow)

Conventional Continuation Strategy (CCS)	Drug-Free Interval Strategy (DFIS)
After 20 cycles of treatment, participant wants to take a break.	Both the patient and the consultant wanted to continue on treatment and not follow the treatment break schedule.
Does not want to complete any further QoLs happy for data to be collected for follow up	Did not want DFIS - as metastases were responding, wanted to continue treatment without break
Finds them a burden, no longer wishes to complete them	Didn't want to take allocated treatment break. Finds questionnaires upsetting
Following toxicities decided would rather have treatment/follow up at a hospital more local to her. did not wish to complete QoLs.	Disease progression, severe pain. Too unwell
Grade 3 toxicities unbearable. Wanted to come off treatment completely and have a period of active surveillance.	Does not want to attend 6 weekly clinic visits as he finds them stressful
He said he couldn't see the point of completing the QoL now he is off the study and doesn't want to be followed up anymore	Doesn't want to restart treatment at present due to toxicity of drug. Slow progression of disease. Would prefer surveillance at the moment
In pain and would rather not complete any more forms but happy to have data collected by research nurse for follow-up	Feels she is deteriorating
Moved site	Moving to Holland, no local site carrying out STAR trial
Patient did not feel relevant now he is off trial treatment	Participant preference
Patient expressed a desire to stop receiving QoLs due to the loss of his significant other	Participant wanted to continue on Sutent but did not wish to have protocol defined breaks.
Patient has moved to Spain Dec 2019	Patient found them irrelevant

Conventional Continuation Strategy (CCS)	Drug-Free Interval Strategy (DFIS)
Patient now too ill to attend clinic appointments	Patient has been informed of disease progression. Not for TKI's but just palliative radiotherapy. General health insidiously deteriorating. Patient does not wish to continue with QoL, blood tests or observations.
Patient states that she finds the questionnaires too long and difficult to answer	Patient prefers to take the trial medication differently than the trial protocol stipulates I one week on, week off over 6 weeks as he feels it is better tolerated
Patient wanted to have non protocol identified breaks. Consultant Prof Powles agreed with this.	Patient stated that he has nothing to offer the trial as he has stopped taking trial treatment. He is under the care of another hospital.
Patient was taken off treatment due to a reaction. The patient then decided to withdraw consent for follow up due to the implications of coming in for additional visits.	Patient upset with 12 weeks CT scans and regular follow up visits once patient has been on treatment break since 2015
Patient wished for treatment breaks which were not in protocol	Patient was frightened if not on treatment disease could progress. So was not keen to go on a treatment break
Pt has a painful right knee. Wants to stop Pazopanib so that she is fit enough for any potential treatment	Performance status 2, disease has progressed.
Questionnaires are too long and difficult to read/answer (Patient is elderly)	Quality of Life forms repetitive and time consuming. Does not want to take a treatment break.
They do not want to complete anymore QoL	Side effects from Pazopanib
Toxicities	Stopped taking Sunitinib due to toxicity, patient declined re-instating at a lower dose.
Toxicities causing problems with life balance	Symptomatic toxicities

Conventional Continuation Strategy (CCS)	Drug-Free Interval Strategy (DFIS)
Toxicity	The patient is no longer having treatment at Broomfield. They are under care of The Royal Marsden
Wants home delivery	Toxicities too much
<p>patient 524 does not speak English as his first language. When he joined the study, he was happy to complete the questionnaires with the help of relatives and friends but as he went through the study he was less able to get help with the questionnaires and was unable to complete them on his own. At cycle 6, he declined to do any further QoL's</p>	<p>Toxicities were un-manageable for patient.</p>
	<p>Toxicity of Sunitinib</p> <p>Wants to continue on Pazopanib without treatment breaks to ensure stabilisation of disease</p> <p>Wants to start new treatment</p> <p>pazopanib did not suit him</p> <p>wanted to receive standard treatment at a more local hospital as travelling becoming an issue</p>

Supplementary Table 6:: Protocol Violations / Deviations, by Randomisation Allocation (G5\_ParticipantFlow)

	<b>Conventional Continuation Strategy (CCS) (n=38)</b>	<b>Drug-Free Interval Strategy (DFIS) (n=33)</b>	<b>Total (n=71)</b>
<b>Eligibility Breach</b>			
Yes	26 (63.4%)	24 (68.6%)	50 (65.8%)
No	15 (36.6%)	11 (31.4%)	26 (34.2%)
<b>Participant has been overdosed</b>			
Yes	5 (12.2%)	3 (8.6%)	8 (10.5%)
No	35 (85.4%)	32 (91.4%)	67 (88.2%)
Missing	1 (2.4%)	0 (0.0%)	1 (1.3%)
<b>Participant has been underdosed</b>			
Yes	10 (24.4%)	7 (20.0%)	17 (22.4%)
No	30 (73.2%)	28 (80.0%)	58 (76.3%)
Missing	1 (2.4%)	0 (0.0%)	1 (1.3%)
<b>Total</b>	<b>41 (100%)</b>	<b>35 (100%)</b>	<b>76 (100%)</b>

*Note, the numbers in the heading refer to the number of participants considered, the number in the total row refers to the number of reasons. Note, these are presented as N (%) for each category, where % is calculated out of the total number of occurrences.*

*Supplementary Table 7: Eligibility Criteria Breached, by Randomisation Allocation (G5\_ParticipantFlow)*

	<b>Conventional Continuation Strategy (CCS) (n=25)</b>	<b>Drug-Free Interval Strategy (DFIS) (n=24)</b>	<b>Total (n=49)</b>
Does the patient have histological confirmation of a component of clear cell renal cell cancer?	0 (0.0%)	1 (3.8%)	1 (1.9%)
Does the patient have uni-dimensionally measurable disease?	1 (3.7%)	1 (3.8%)	2 (3.8%)
Does the patient have adequate renal biochemistry?	1 (3.7%)	1 (3.8%)	2 (3.8%)
Is the patient able and willing to comply with the terms of the protocol?	23 (85.2%)	22 (84.6%)	45 (84.9%)
Does the patient have poorly controlled hypertension despite maximal medical therapy?	2 (7.4%)	1 (3.8%)	3 (5.7%)
<b>Total</b>	<b>27 (100%)</b>	<b>26 (100%)</b>	<b>53 (100%)</b>

*Note, the numbers in the heading refer to the number of participants considered, the number in the total row refers to the number of breaches. Note, these are presented as N (%) for each category, where % is calculated out of the total number of occurrences. Note that one participant violated the same eligibility criteria twice across two separate protocol violations which explains the 50 total in Supplementary Table 6 equating to 49 participants in*

Supplementary Table 7.

## 2.2 Baseline Characteristics

## 2.4 Overall Survival

*Supplementary Table 18: Other Causes of Death Reported, by Randomisation Allocation, in the PP Population (P1b\_OSPrimaryAnalysis)*

Conventional Continuation Strategy (CCS)	Drug-Free Interval Strategy (DFIS)
(a) Bronchopneumonia (b) Metastatic clear cell renal cell carcinoma	Adenocarcinoma and transverse colon cancer
1. Spontaneous right peritoneal haemorrhage. 2. Aspiration Low molecular weight, Heparin treatment for pulmonar	
1a - Probable Pulmonary Embolism, 1b - Aspiration pneumonia Immobility secondary to insertion of intramedullary nail,	
Acute renal failure	Brain tumour
Baseline renal impairment	Bronchopneumonia, carcinomatosis renal cell carcinoma
Bilateral atypical pneumonia	COPD
Bone	Caraniomatosis
Bowel perforation	Carcinomatosis
Carcinomatosis	Carcinomatosis, Osteomyelitis, hypertension, cerebrovascular disease
Community acquired Pneumonia	Clinician-led withdrawal from study. Pt died 17/05/16 due to illness-cancer
Community acquired pneumonia	Dementia
Community acquired pneumonia	Depression
Community acquired pneumonia	Hepatic Encephalopathy
Community aquired infection	Hospital acquired pneumonia
Emergency laparotomy procedure for a transverse colon perforation	Intracerebral haemorrhage, intracerebral metastases

Conventional Continuation Strategy (CCS)	Drug-Free Interval Strategy (DFIS)
Frontal lobe bleed	Ischaemic stroke/transient ischaemic attacks
General frailty	Klebsiella Pneumonia
Haemorrhagic Stroke	Large bowel ischaemia
He had had a cerebellar haemorrhage on 09-11-2019 causing dysphagia	Left Intra cerebral bleed
Heart failure	Left sided pleural effusion
Hepatorenal failure	Metastatic hypernephroma
Hospital acquired pneumonia	Mid lower zone pneumonia
Hypercalcaemia	Pneumonia
Hypertension	Pneumonia
Intra pleural metastatic disease	Pneumonia, COPD
Intracerebral Haemorrhage	Pneumonia, Hypertension
Ischaemic disease	Pneumonia, renal failure
Lobar pneumonia	Pulmonary Embolism
Lower respiratory tract infection	Pulmonary embolism
Metastases to lung, lymph nodes and adrenal	Pulmonary embolism
Multiple strokes	Renal Failure
Neuro-endocrine Stromal Tumour	Sepsis
Periphic Abscess	Sepsis cellulitis. Ischaemic Heart disease
Pneumonia	Sepsis, intra-abdominal infection, perforated peptic ulcer
Pneumonia	Sepsis, pneumonia, type II diabetes
Pneumonia	Severe Sepsis
Small bowel perforation	Spinal cord compression

Conventional Continuation Strategy (CCS)	Drug-Free Interval Strategy (DFIS)
Spontaneous intra-cranial bleed. Cerebral metastases	Sudden death syndrome; 1) Ischaemic heart disease 2) Renal cancer
Type 2 Diabetes	Type 2 diabetes, Hypertension, Congestive cardiac failure, Hypothyroidism
Urinary sepsis	kidney failure second to aggressive bony metastasis
Urosepsis	pneumonia
acute on chronic renal failure - left ventricular heart failure	
co-existing colorectal cancer	
haemoptysis, pulmonary embolism	
intracranial haemorrhage	

*Supplementary Table 19: Mutually Exclusive Causes of Death, by TKI, in the PP Population (P1b\_OSPrimaryAnalysis)*

	Sunitinib (n=280)	Pazopanib (n=368)	Total (n=648)
Renal Cancer	234 (83.6%)	292 (79.3%)	526 (81.2%)
Renal Cancer, Other	24 (8.6%)	37 (10.1%)	61 (9.4%)
Unknown	8 (2.9%)	8 (2.2%)	16 (2.5%)
Other	4 (1.4%)	11 (3.0%)	15 (2.3%)
Renal Cancer, Cardiovascular Related	2 (0.7%)	7 (1.9%)	9 (1.4%)
Renal Cancer, Cardiovascular Related, Other	2 (0.7%)	3 (0.8%)	5 (0.8%)
Cardiovascular Related	3 (1.1%)	0 (0.0%)	3 (0.5%)
Trial Toxicity	0 (0.0%)	3 (0.8%)	3 (0.5%)
Renal Cancer, Trial Toxicity	0 (0.0%)	2 (0.5%)	2 (0.3%)

	<b>Sunitinib (n=280)</b>	<b>Pazopanib (n=368)</b>	<b>Total (n=648)</b>
Renal Cancer, Trial Toxicity, Cardiovascular Related, Other	1 (0.4%)	1 (0.3%)	2 (0.3%)
Trial Toxicity, Cardiovascular Related	1 (0.4%)	1 (0.3%)	2 (0.3%)
Trial Toxicity, Other	0 (0.0%)	2 (0.5%)	2 (0.3%)
Renal Cancer, Trial Toxicity, Other	1 (0.4%)	0 (0.0%)	1 (0.2%)
Renal Cancer, Unknown	0 (0.0%)	1 (0.3%)	1 (0.2%)

Note, these are presented as N (%), where % is calculated out of the total number given in the table header.

*Supplementary Table 20: Other Causes of Death Reported, by TKI, in the PP Population (P1b\_OSPrimaryAnalysis)*

<b>Randomised under Sunitinib</b>	<b>Randomised under Pazopanib</b>
Acute renal failure	(a) Bronchopneumonia (b) Metastatic clear cell renal cell carcinoma
Baseline renal impairment	1. Spontaneous right peritoneal haemorrhage. 2. Low molecular weight, Heparin treatment for pulmonar
Bronchopneumonia, carcinomatosis renal cell carcinoma	1a - Probable Pulmonary Embolism, 1b - Immobility secondary to insertion of intramedullary nail,
Carcinomatosis	Adenocarcinoma and transverse colon cancer
Carcinomatosis	Aspiration
Community acquired pneumonia	Aspiration pneumonia
Community acquired pneumonia	Bilateral atypical pneumonia
Community aquired infection	Bone
He had had a cerebellar haemorrhage on 09-11-2019 causing dysphagia	Bowel perforation

Randomised under Sunitinib	Randomised under Pazopanib
Hepatorenal failure	Brain tumour
Hospital acquired pneumonia	COPD
Hypertension	Caraniomatosis
Intracerebral Haemorrhage	Carcinomatosis, Osteomyelitis, hypertension, cerebrovascular disease
Left sided pleural effusion	Clinician-led withdrawal from study. Pt died 17/05/16 due to illness-cancer

Supplementary Table 86: Line Listing of all SUSARs (S5e\_Toxicity\_LineListings)

Observation number	Randomisation allocation	MedDRA System Organ Class	SUSAR Medical Description	SUSAR Case Description	CTCAE grade	Associated symptoms
1	Conventional Continuation Strategy (CCS)	Cardiac disorders	Myocardial Infarction	Worsening shortness of breath. Patient taken to local A&E, ECG demonstrated acute MI, chest X-ray showed right sided pleural effusion	3	
2	Conventional Continuation Strategy (CCS)	Eye disorders	Detached retina	Patient noticed his eye sight had deteriorated - went to A&E and was diagnosed with a detached retina. New info rec 18/06/2015: Fix with op on 24/07/2014.	3	Loss of sight L eye
3	Conventional Continuation Strategy (CCS)	Musculoskeletal and connective tissue disorders	Avascular necrosis	Admitted via clinic in severe pain, demonstrating extreme side effects from a concoction of analgesics. Admitted. MRI scan left hip - Avascular Necrosis. Declined surgery for medical management.	2	Severe Pain
4	Conventional Continuation Strategy (CCS)	Respiratory, thoracic and mediastinal disorders	?Gastric Perforation (abdo pain)	Admitted to Whipps X Hospital with abdominal - epigastric pain radiating to the back. Bloods showed CRP 40 and amylase 167. CT showed air-fluid collection suspicious for contained perforation at level of pylorus. Treated with IV antibiotics, fluids and analgesics. Discharged well on 01/11/2013.	3	

Observation number	Randomisation allocation	MedDRA System Organ Class	SUSAR Medical Description	SUSAR Case Description	CTCAE grade	Associated symptoms
5	Conventional Continuation Strategy (CCS)	Renal and urinary disorders	Acute renal failure	Patient admitted for IV fluids following abnormal renal function test results. Now recovering.	3	
6	Drug-Free Interval Strategy (DFIS)	Renal and urinary disorders	Pain R flank	Patient admitted into accident and emergency with 2 day history of R flank pain 7/10 which developed into acute pain on inspiration on 19/05/2014. They also experienced grade 2 fatigue contributing to him spending >50% time in bed. On admission they commenced IV tazocin and began investigations to rule out pulmonary embolus - awaiting results. New info received 30/05/2014: Not pulmonary embolus. Pain from tumour as final diagnosis - CT confirms slight increase in size of tumour suggestive of responce rather than recurrence. Confirmed as SUSAR. Pain now resolving and pain relief prescribed (Oramorph 1.75-2.5mg PRN). Sutent on hold until review on 06/06/2014.	2	

Observation number	Randomisation allocation	MedDRA System Organ Class	SUSAR Medical Description	SUSAR Case Description	CTCAE grade	Associated symptoms
7	Drug-Free Interval Strategy (DFIS)	Vascular disorders	Abdominal aortic aneurysm	AAA that has leaked increase size to 5.8cm from 5.3cm	5	Sharp abdominal pain
8	Drug-Free Interval Strategy (DFIS)	Blood and lymphatic system disorders	Autoimmune thrombocytopenia	Platelets 3 after 2 weeks. Given platelet transfusions with no benefit. Platelets remain under 10. Commenced steroids and immunoglobulins. New info rec 07/11/2014: Discharged 25/06/2013 - platelets 13. Platelets 296 01/08/2013.	4	
9	Drug-Free Interval Strategy (DFIS)	Nervous system disorders	Multifocal intracranial haemorrhage	Seen 20/03 in clinic with staggering gait and subtle neurology. CT head showed bleed. MRI arranged which shows multifocal intracranial haemorrhage. BP has been high, platelets 80-95.	2	
10	Drug-Free Interval Strategy (DFIS)	Vascular disorders	Bowel Ischaemia	Acute deterioration within 24 hours of admission. Patient died. Post mortem results requested from coroner 25/07/2016	5	

Observation number	Randomisation allocation	MedDRA System Organ Class	SUSAR Medical Description	SUSAR Case Description	CTCAE grade	Associated symptoms
11	Drug-Free Interval Strategy (DFIS)	Neoplasms benign, malignant and unspecified (including cysts and polyps)	New primary squamous cell	Lesions removed from temple. Diagnosed as new primary squamous cell	4	
12	Drug-Free Interval Strategy (DFIS)	Hepatobiliary disorders	Hepatorenal syndrome	Patient admitted with deranged liver function. 03/02/2015 ultrasound kidney; no obstruction demonstrated. 04/02/2015 US abdomen; fatty liver, no hydronephrosis. Kidneys failed. Died.	5	
13	Drug-Free Interval Strategy (DFIS)	Cardiac disorders	Sudden death syndrome	c/o being unwell on 04/10/2016 but had not sought medical attention. Family found her unresponsive on 05/10/2016 evening. Paramedic called and declared dead.	5

13	Ischemic heart disease	29/09/2016	05/10/2016	05/10/2016	1	Participant died

Supplementary Table 88: Line Listing of all SUSARs (S5e\_Toxicity\_LineListings) cont.

Observation number	Outcome	Place of SUSAR	Recovery date	Date of death	Other causality?	Causality if other illness	Causality if other reason	First ever trial medication	Start date of 1st dose	First dose (mg/day)	Date most recent dose	Most recent dose (mg/day)
1	Recovered	Hospital	08/10/2012	.	Other illness	Previously known hypertension	Ex - smoker	Sunitinib	06/06/2012	50	25/09/2012	50
2	Recovered	Home	24/07/2014	.	.			Pazopanib	29/10/2013	800	21/07/2014	400
3	Ongoing at the time of death	Home	.	.	.			Pazopanib	25/02/2015	800	29/10/2015	400
4	Recovered	Home	01/11/2013	.	Renal cancer			Pazopanib	12/07/2013	800	24/10/2013	800
5	Recovered	Home	23/09/2014	.	.			Pazopanib	24/07/2014	800	19/08/2014	800

Observation number	Outcome	Place of SUSAR	Recovery date	Date of death	Other causality?	Causality if other illness	Causality if other reason	First ever trial medication	Start date of 1st dose	First dose (mg/day)	Date most recent dose	Most recent dose (mg/day)
6	Recovered with sequelae	Home	23/05/2014	.	Renal cancer			Sunitinib	09/05/2014	50	18/05/2014	50
7	Death	Hospital	.	08/01/2020	Other illness	Idiopathic abdominal aortic aneurysm		Pazopanib	12/08/2015	800	06/01/2020	800
8	Recovered	Hospital	01/08/2013	.	.			Sunitinib	21/05/2013	50	03/06/2013	50
9	Recovered	Home	16/05/2014	.	Other illness	Hypertension		Pazopanib	15/01/2014	800	19/03/2014	400
10	Death	Home	.	18/07/2016	Renal cancer	Ischaemic heart disease		Pazopanib	08/04/2015	800	17/07/2016	400

Observation number	Outcome	Place of SUSAR	Recovery date	Date of death	Other causality?	Causality if other illness	Causality if other reason	First ever trial medication	Start date of 1st dose	First dose (mg/day)	Date most recent dose	Most recent dose (mg/day)
11	Recovered with sequelae	.	22/02/2016	.	Other		Age and sundamage	Sunitinib	25/10/2013	50	16/02/2016	37.5
12	Death	Home	.	13/02/2015	Other illness	Unknown		Pazopanib	20/03/2014	800	03/02/2015	400
13	Death	Home	.	05/10/2016	Other illness	Ischemic heart disease		Pazopanib	29/09/2016	800	04/10/2016	800

Supplementary Table 89: Confirmed cases of Osteonecrosis of the Jaw (S5g\_ONJ)

Observation Number	TKI Received	Randomisation Allocation	Date of last treatment dose	Date of first symptom	Date ONJ confirmed	History of invasive dental procedures	Dental work whilst on trial	Oral bisphosphonates	Previous radiotherapy to the jaw	Palate	Maxilla	Mandible
1	Sunitinib	Drug-Free Interval Strategy (DFIS)	21/12/2014	05/01/2015	14/04/2015	No	No	Yes	No	No	No	Yes
2	Sunitinib	Drug-Free Interval Strategy (DFIS)	21/01/2015	05/12/2014	12/02/2016	No	Yes	No	No	No	No	Yes
3	Sunitinib	Conventional Continuation Strategy (CCS)	01/05/2016	02/05/2016	29/07/2016	No	Yes	Yes	No	No	Yes	No
4	Sunitinib	Conventional Continuation Strategy (CCS)	27/02/2018	16/10/2017	01/03/2018	Yes	Yes	Yes	No	.	.	.

Supplementary Table 90: Confirmed cases of Osteonecrosis of the Jaw (S5g\_ONJ) cont.

Observation Number	Localized to side	Relationship to teeth	Necrotic bone visible	Ulceration	Bleeding	Discharge	Size	Other	Other details	Date of Conservative resection	Date of Operative resection	Response to treatment	Further action
1	No	No	Yes	Yes	Yes	Yes	1cm	Yes	scabby areas	.	.	No	antibiotics only at this stage
2	No	No	No	No	No	Yes	8cm	No		.	.	Yes	
3	No	Yes	Yes	Yes	Yes	Yes	1	Yes	Blister on upper hard pallate	29/07/2016	03/11/2016	Yes	
4	.	.	.	.	.	.		No		.	.	.
