

Report Supplementary Material 4

Table 1: Study 7 Baseline Sociodemographic Characteristics

Total sample N = 104	Non-completers	Partial completers	Full completers
Sociodemographic			
Mean age, years	38.19 N=32	44.30 N=10	34.07 N=54
S.D.	10.88	9.51	8.76
Self-identified gender, N			
Women	26 76.5%		
Men	6 17.6%		
Ethnicity, N			
White	25 73.5%	8 80%	48 80%
Black African, Caribbean, British	4 11.8%	1 10%	1 1.7%
Asian or Asian British	0 0%	1 10%	5 8.3%
Multiple ethnic groups	2 5.9%	0 0%	0 0%
Other ethnic group	1 2.9%	0 0%	0 0%
University degree, N			
	27 79.4%	6 60%	50 83.3%
Years since qualifying, mean	10.88 N=29	17.4 N=10	7.24 N=52
S.D.	8.62	12.33	7.64
Years in organisation, mean	7.31 N=31	11.36 N=10	4.80 N=53
S.D.	8.21	13.04	5.67
Years working in psychosis, mean	8.02 N=31	13.2 N=10	5.35 N=53
S.D.	7.52	10.94	5.5
Occupation, N			
Psychologist	6 17.6%	2 20%	19 31.7%
Nurse	21 61.8%	4 40%	14 23.3%
Occupational therapist	2 5.9%	1 10%	5 8.3%
Other allied health professional	2 5.9%	1 10%	9 15%
Psychiatrist	0 0%	3 30%	4 6.7%
Student	1 2.9%	0 0%	3 5%
Setting, N			
Outpatient	22 64.7%	10 100%	35 58.3%
Inpatient	7 20.6%	0 0%	18 30%
Other	3 8.8%	0 0%	1 1.7%
Previous CRT training, N			
Yes	0 0%	0 0%	2 3.3%
No	36 87.8%	10 100%	52 86.7%

Table 2: Study 7: Crude and Adjusted Analysis showing Odds Ratio (OR) and Adjusted OR (AOR) of Questionnaire Result for Years Practice Since Qualifying and Working in Psychosis from Logistic Regression Models

	Odds Ratio (OR)					Adjusted Odds Ratio (AOR)*			
	N	OR	Lower CI	Upper CI	P Value	AOR	Lower CI	Upper CI	P Value
Years practice since qualifying	62	0.9	0.84	0.97	0.005	0.91	0.84	0.99	0.025
Years working in psychosis	63	0.87	0.8	0.96	0.006	0.89	0.8	0.99	0.033

*Adjusted for Professional Role
