

Supplementary Material 2

Supplementary Results Tables for Chapter 7

Table 1: Descriptive statistics.....	1
Table 2: Generalised linear model results predicting subjective wellbeing by EVI	4
Table 3 Generalised linear modelling results predicting subjective wellbeing by proximity to nearest green or blue space for a) WEMWBS and b) Life satisfaction.....	5
Table 4: Generalised linear modelling results predicting WEMWBS and life satisfaction by weekly time outdoors.....	10
Table 5: Full generalised linear model results predicting time outdoors by a) EVI and b) proximity to nearest GBS	12
Table 6: Full model results predicting SWB by EVI and proximity to GBS including interactions with urban status	15
Table 7: Full generalised linear model results exploring the potential for mediation of the relationship between EVI and WEMWBS by time outdoors.....	17
Table 8: Full generalised linear model results exploring the potential for mediation of the relationship between EVI and life satisfaction by weekly time outdoors.....	19
Table 9: Full generalised linear modelling results predicting CMD status by residential GBS exposure: a) EVI and b) proximity to nearest GBS	21
Table 10: Full generalised linear model results for weekly time outdoors predicting CMD status.....	25
Table 11: Full generalized linear model results predicting weekly time walking as moderate activity (mins) by a) EVI and b) proximity to nearest GBS.....	26
Table 12: Full generalised linear model results predicting subjective wellbeing by weekly time spent walking	29
Table 13: Generalised linear modelling results exploring the potential for mediation of the relationship between EVI and WEMWBS by weekly time walking.....	31
Table 14: Generalised linear model results exploring the potential for mediation of the relationship between EVI and life satisfaction by weekly time walking as moderate PA.....	33
Table 15: Generalised linear model results predicting weekly time walking as moderate PA (mins) by weekly time outdoors (mins).....	35
Table 16: Generalised linear model results exploring the potential for mediation of the relationship between time outdoors and WEMWBS by time walking as moderate PA.....	36
Table 17: Generalised linear model results exploring the potential for mediation of the relationship between time outdoors and life satisfaction by time walking as moderate PA.....	38
Table 18: Generalised linear modelling results predicting subjective wellbeing (WEMWBS & life satisfaction) by environmental exposures (EVI, GBS proximity and leisure time outdoors) with an interaction with deprivation status.....	40

Table 1: Descriptive statistics

-
- a. Warwick & Edinburgh Mental Well-being Scale (scale range 14-70); higher number indicates an increased sense of wellbeing
 - b. Life satisfaction (scale range 0-10); higher number indicates increased life satisfaction
 - c. Percentage with high likelihood of a Common Mental health Disorder
 - d. Derived leisure time spent outdoors per week (minutes)
 - e. Derived time spent walking at or above moderate activity threshold per week (minutes)

Some variables modelled as continuous are given here as categories for descriptive purposes
