INTERVIEW 01 DSN GROUP | INTERVIEW 20 DSN group t | INTERVIEW 18 Diabetes Cons

R: [Um] She's xxxx she's having not, you know, been able to come to terms with the diagnosis of diabetes [um] from childhood she's felt that no-one's been able to help her. And though she's been attending, if you look at her attendance it's been really good over the last ten years, you know, when I look at our system but attendance is there but in terms of, you know, engagement with [um] what's the word, so in terms of following the advice, you know, what she's been told.

I: Yeah.

R: You know, that, there's a gap there, that doesn't happen, so each

I: There doesn't seem to be an improvement?

R: Yeah, yeah exactly. So each clinic I when I'm looking at the data and I'm looking at the following one it's the same thing written.

I: No change

Power formatted literacy content
 1. avoid repetition in entire content for features and analysis, more editing is overall
 2. literature or sub-point
 3. dependent on literature
 4. dependent on literature advice
