

We are now going to ask you some questions about this audit report excerpt

Please answer the following questions

Some of the questions may seem similar; bear with us, this is deliberate for methodological rigour.

Our initial questions concern the standard: Adults with type 2 diabetes whose HbA1c level is 58mmol/mol (7.5%) or above after 6 months with single-drug treatment are offered dual therapy.

You may [step back](#) to look at the audit report again, but any answers entered on this page will not be saved.

1 Which of these descriptions best describes your role in relation to this standard?

Please select...

2 Considering the time and resources available to you and other clinical priorities, please indicate how much you agree or disagree with the following statements.

Over the next three months, I **intend** to ensure that our patients with type 2 diabetes whose HbA1c level is 58mmol/mol or above following 6 months with single-drug treatment are offered dual therapy.

Completely agree

Completely disagree
