End of Study Update 1 to Participant Information Sheet

For patients who started laser therapy before 06July2018

Version Number 1.0 03Sep2019

Dear Participant

Thank you for your participation in the “LiTEFORM: Lite Therapy Effectiveness For ORal Mucositis” study.

You have completed all of the follow-up visits.

Getting to know your results.

During our patient interviews, some participants told us they were interested in finding out which ‘group’ they had taken part in (active or sham laser).

We are giving you the opportunity to find out this information, if you wish.

To make the study fair, both you and the research team did not know who had the laser light therapy and who had the sham during the study. We will have finished collecting all our information from participants shortly so we will be able to let you know which group were in, but only if you would like to find out. If you were allocated to the sham laser you still received the standard treatment that you would have received if you did not take part in the study. If you have any clinical questions about your ongoing care please speak to your doctor.

If you would like to find out which group you were in you can contact your local research administrator **between** {site to localise with date} - {site to localise with date} using the details below:

Contact name: {site to localise}

Contact phone/ email: {site to localise}

If you **do not** wish to find out then you **don’t** have to contact your local team.

Study Results: The results for the whole study will be available in spring/summer 2020 on our website www.liteform.org.uk. Remember these results will not identify you in any way.

We would like to thank you again for participating in the LiTEFORM study.

Yours sincerely,

LiTEFORM trial team.
