Mapping study - pilot surveys

All stakeholders

CATCh-uS: Children and adolescents with Attention Deficit Hyperactivity Disorder in transition between children's services and adult services

Mapping the availability of services for young people with ADHD

The CATCh-uS study is funded by the National Institute for Health Research and has ethical approval. Details can be found on our <u>website</u>. The aim of this survey is to map available services for young people with Attention Deficit Hyperactivity Disorder (ADHD) who are aged 18 and over. We only want to know about services in your area and will not share any of your personal information. The survey is anonymous and confidential. Answers will help to create a list of existing services. This is to support the overall study aims of informing and improving service provision for young adults with ADHD.

Please answer the following questions to help us map available ADHD services in the UK. The survey should take no longer than 5 minutes to complete.

| 1. A | re you a? |
|------------|---|
| 0 | Young person (from 14 up to 17 years old) |
| 0 | Young adult (18 or older) |
| \circ | A parent/carer of a young person |
| \bigcirc | A clinician working with young people and/or adults with ADHD |
| \circ | Other (please specify) |
| | |
