

UK FASHIoN

Expert patient interview schedule

These open-ended questions will be used to prompt the discussion of relevant topics.

1. What has it been like for you to have hip impingement?
2. How did you reach the decision about your hip treatment?
3. What options did you explore?
4. What are the advantages and disadvantages of each treatment?
5. What sort of information did you have and from where or whom?
6. What impact has the treatment had on your life?
7. What/ who helped you the most to reach a decision?
8. What did you find less useful?
9. What could we do to best support patients making a decision?

Was there anything we did or said which made it more difficult for you to reach your decision?

10. What do you think could most help other patients make a decision?
11. What do you think would be less useful?
12. How do you feel about operative and non-operative care?
13. What do you understand for randomisation?
14. How would you feel about being involved in randomization?

What do you think randomisation is?

15. How would you like the information to be presented?

UK FASHIoN
Expert patient panel questionnaire

Thank you for agreeing to take part in the expert patient panel. We appreciate your views and any advice you can give us about how best to present information about a trial to future patients, who, like you, have been diagnosed with hip impingement.

This questionnaire is designed to test the following:

- Whether the information offered to patients is easy to understand
- Whether sufficient information is given to allow a patient to make a decision about taking part in a study comparing two treatments for hip impingement.

Please bear in mind that it is the patient information sheet for the UK FASHIoN Study that is being tested and not your knowledge about the condition.

Instructions

1. Please read the attached patient information sheet for the UK FASHIoN study.
2. Please read the list of 6 statements about the text you have just read.

For each one, please answer according to your agreement with the following:

- The information related to the statement is on the information sheet
- The information is easy to understand

The options are:

- Disagree
- Partially agree as the information is difficult to find / understand (i.e. I spent more than 3 minutes looking for it)
- Agree

3. Please complete the general questions on the last page
4. Finally, please print study ID number and today's date in the space provided.

Imagine you have just been diagnosed with hip impingement. Your consultant tells you about a study that is comparing two different treatments for your condition and which you are eligible to take part in if you decide to do so.

In order to help you decide, your consultant gives you the UK FASHIoN patient information sheet to read.

What does the information say about the following?

Why it is important to treat hip impingement	Disagree	Partially agree	Agree
The information is in the patient information sheet	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
The information is easy to understand	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

The purpose of this study	Disagree	Partially agree	Agree
The information is in the patient information sheet	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
The information is easy to understand	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

What operative care involves and its risks	Disagree	Partially agree	Agree
The information is in the patient information sheet	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
The information is easy to understand	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

What happens after the study finishes	Disagree	Partially agree	Agree
The information is in the patient information sheet	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
The information is easy to understand	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

What non-operative care involves and its risks	Disagree	Partially agree	Agree
The information is in the patient information sheet	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
The information is easy to understand	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

Why 50:50 treatment allocation is important	Disagree	Partially agree	Agree
The information is in the patient information sheet	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
The information is easy to understand	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

Comments:

Imagine you have to make the decision to enter this study, would you agree to take part? Please tell us about the reasons for your decision.

Do you think the treatment options discussed in the patient information sheet are presented in a balance way (operative vs. non-operative treatment)? Is one option better than the other according to the information sheet?

Is the wording in the patient information sheet easy to understand?

What do you think about the level of detail included in the information sheet? (For example, is it too little? Did it address all your concerns? Or is it too much? What would you leave out?)

What do you think of the layout and design of the information? Do you have any suggestions about how to improve it?

What name would you prefer for the non-operative treatment?

Please help us to choose a name, your suggestions are welcome.

Focused Hip Therapy (FHT)

Focused Hip Programme (FHP)

Personalised Hip Therapy (PHT)

Personalised Hip Programme (PHP)

Other _____

Please tell us why

Any other comments

Please print ID study no:.....

Today's date:

Please return the questionnaire using the pre-paid envelope supplied

Thank You!

Thank you for your time and valuable contribution. Your feedback will be used to improve the patient information sheet that will be used in a trial comparing the operative vs. non-operative care of future patients. This trial will help us to obtain important evidence about the best treatment for this condition.

If you have indicated on your consent form that you are willing to take part in an interview, we will contact you again. Interviews will explore further aspects of the treatment you have already received and how you would feel if you were asked to take part in a trial such as this. If you do not wish to be interviewed, you can opt out without any consequences for your care.

If you have further comments or questions regarding this study please contact the study co-ordinator, Rachel Hobson by either telephoning 02476 968629 or emailing at fashion@warwick.ac.uk
