

Interviewer:

Location:

Date:

Consent collected for recording: Y/N

1. How did you feel about offering an HIV test specifically to black Africans?
2. You were asked to closed follow the intervention wording we provided as you targeted black African people. How did you find that worked in reality?
3. Do you feel your organisation benefitted in any way from distributing these kits? What about those who use your services, did they benefit in any way?
4. How feasible is this approach in the future for you? What would you change?

\*PROBE about whether it was the script/kit/or the research process and paperwork that needs changing

5. In your view, do you think black African people would like to use a kit like this to find out their HIV status?

\*Probe: why/why not? Was it the same for everyone? How could that be different for different people?

6. Anything else you might like to add before we finish?
