

Date created	Code name	Definition
17/07/2019	Areas for improvement	
29/07/2019	Couldn't or wouldn't change a thing	Nurse reports that they cannot think of anything to change, or would not change anything about the intervention
26/07/2019	Imp - Discuss WL with mother sooner	Nurse suggests that the topic of weight loss could be discussed sooner e.g. during pregnancy
26/07/2019	Imp - Diversify approach	Nurse suggests that it would be useful for mothers to have a physical information pack, that could be given earlier, or other ways to pass on the info
30/07/2019	Imp - Earlier warning PIMMS-WL mums	Nurse suggests that it would be useful to know earlier when PIMMS-WL mothers will be in their appointment
26/07/2019	Imp - Separate meeting for mum	Nurse suggests that the intervention could be more of a separate meeting focused on mother or weight specifically, not for baby
24/07/2019	Imp - Weighing not sole focus	Nurses suggests that when the topic of weight loss is raised, the appointment should not be solely about the weight (gain) of the mother
17/07/2019	Assessment of training	
17/07/2019	Feeling anxious until after first PIMMS-WL mother	Nurse reports feeling a little anxious until they have put the training into practice with a mother
17/07/2019	Feeling prepared after training	Nurse feels prepared to deliver PIMMS-WL after training
25/07/2019	Gap between training and first PIMMS-WL mum	Nurse reports that there was too long an interval between the initial training and when they had to put it into practice.
25/07/2019	Imp - Additional training session	Nurse suggests an additional session needed for delivering PIMMS-WL, so the training can 'sink in', or be practiced to be better remembered

26/07/2019	Imp - Digital manual	Nurse suggests that it would be useful to have a digital copy of the manual available. As well as a physical copy
17/07/2019	Imp - Longer session	Nurse reports a longer session needed for delivering PIMMS-WL
26/07/2019	Informed how to identify PIMMS-WL mothers	Nurse remembers being informed to identify mothers that are participating in the PIMMS-WL trial
17/07/2019	Informed on importance of study	Nurse remembers being told about the importance of study and / or reasons behind it
31/07/2019	Informed to check if weighing	Nurse remembers being told to ask mothers if they were weighing or to check the red book
22/07/2019	Informed to encourage	Nurses remembers to encourage mothers to lose weight, from the training
17/07/2019	Informed to take consent for recording	Nurse remembers being informed to take consent for recording mothers
17/07/2019	Informed to weigh and how to use scales	Nurses remembers being told how to use the scales in training
25/07/2019	Lot of content covered quickly	Nurse reports that the training covers a lot of content, too fast
22/07/2019	Manual covered all	Nurse reports that they felt that the manual was comprehensive, exhaustive, or covered everything that they needed to know
22/07/2019	Manual was easy to use	Nurse reports that they felt that the manual was easy to use, simple or not too complicated

22/07/2019	Manual was useful	Nurse reports that they felt that the manual was helpful or very helpful, or found some use from the manual
26/07/2019	No time to read manual	Nurse reports that they did not find the time, or have the capacity, to read the manual
26/07/2019	Not feeling prepared after training	Nurse reports that they do NOT feel prepared after training to deliver PIMMS-WL
26/07/2019	Rarely or did not refer back to manual	Nurse reports that they rarely referred, or did not refer, back to the manual after initial training
17/07/2019	Refer to website	Nurses remembers instructions on what to say / to refer mother to the website from training
17/07/2019	Referring to website saves time	Nurses understand the reasoning for referring mothers to website instead of giving advice directly
17/07/2019	Refreshing with manual	Nurse needing to quickly refresh on manual just before seeing PIMMS-WL mother
26/07/2019	Training was easy	Nurse reports that they found the training easy, or not too difficult
26/07/2019	Training was fine	Nurse reports that training was satisfactory, adequate or fine
26/07/2019	Training was good	Nurse reports that training was good, great or excellent
22/07/2019	Training was minimal	Nurse reports that training was not very much, not comprehensive, or not enough

22/07/2019	Training was quick	Nurse reports that training was quick, or brief
22/07/2019	Training was straightforward	Nurse remembers training being 'factual', 'straightforward' or 'to the point'
17/07/2019	Experience of PIMMS-WL	
08/08/2019	Impact of PIMMS-WL	
24/07/2019	Mothers gained weight PIMMS-WL	Nurse reports that PIMMS-WL was not effective for the mothers at their surgery in terms of weight loss
01/08/2019	Mothers see progress	Nurse reports that PIMMS-WL allowing mothers to see their weight loss is beneficial
25/07/2019	PIMMS-WL encourages	Nurse reports that being in PIMMS, or aspect of PIMMS, provides encouragement for weight loss behaviour
26/07/2019	PIMMS-WL adds 1 - 2 minutes	Nurse reports that they find PIMMS-WL appointment about 1 - 2 minutes longer than a non-PIMMS-WL appointment
22/07/2019	PIMMS-WL adds 2 - 5 minutes	Nurse reports that they find PIMMS-WL appointment about 2 - 5 minutes longer than a non-PIMMS-WL appointment
17/07/2019	PIMMS-WL adds 5 - 10 minutes	Nurse reports that they find PIMMS-WL appointment about 5 minutes longer than a non-PIMMS-WL appointment
26/07/2019	PIMMS-WL does not add time	Nurse reports that they DO NOT find PIMMS-WL appointment any longer than a non-PIMMS-WL appointment
25/07/2019	PIMMS-WL effective	Nurses refer to PIMMS-WL being effective, or that they could see results quickly, or knew that it was working
08/08/2019	Mums' feelings while being weighed	
17/07/2019	Mums giving excuses for no WL	Nurse reports mums giving excuses for why, or giving warning that, their weight will be the same as last appointment or higher

26/07/2019	Mums refused weighing	Nurse reports that some mothers refused to be weighed
25/07/2019	No mums hesitated	Nurse reports that no mothers seemed reluctant to be weighed
17/07/2019	No mums refused weighing	Nurse reports that no mothers refused to be weighed
25/07/2019	Reading mums as comfortable being weighed	Nurse views that mums are comfortable being weighed in front of them
17/07/2019	Reading mums as embarrassed to be weighed	Nurse views that mums are embarrassed to be weighed in front of them
25/07/2019	Reading mums as enjoying being weighed	Nurse views that mums enjoy being weighed in front of them
17/07/2019	Reading mums as uncomfortable being weighed	Nurse views that mums are uncomfortable being weighed in front of them
30/08/2019	Some mums hesitated	Nurse reports that some, or occasionally, mothers seemed reluctant to be weighed
08/08/2019	Nurses' feelings	
17/07/2019	Feeling comfortable with weighing	Nurse reports feeling comfortable with weighing participants and recording their weight
17/07/2019	Feeling confident about weighing	Nurse reports feeling confident about weighing mothers, generally
08/08/2019	Recording weight	
17/07/2019	Easy to access record card	Nurse reports that they find it easy to access the mother's record card

17/07/2019	Easy to forget to record weight	Nurse reports that recording the mother's weight can be easy to forget
17/07/2019	Easy to record weight	Nurse reports that they find recording the mother's weight easy
25/07/2019	Easy to remember to record weight	Nurse reports that recording the mother's weight was easy to remember
29/07/2019	Quick to record weight	Nurse reports that they find recording the mother's weight does not take much time
08/08/2019	Steps in appointment	
22/07/2019	Already checking weight	Nurse reports that they were already regularly weighing mothers <i>before</i> delivering the PIMMS-WL intervention
01/08/2019	Anxiety about getting imms correct	Nurses refers to feeling, or thinking, that immunisation is highly complex, stressful or requires a lot of focus
17/07/2019	Asks if been on website	Nurse reports that they asked if the mother had been on the website
17/07/2019	Asks if can weigh	Nurse reports that they asks if they can weigh mother prior to weighing
24/07/2019	Checking child present and well	Nurse reports checking identity and health of child
17/07/2019	Checks if weighing	Nurse reports that they asked, or checked the record card to see, if the mother had been weighing themselves outside of the immunisation appointments
01/08/2019	Concerns about correct documentation	Nurse reports or demonstrates concern that they record the intervention correctly on the IT system, or accessing records for both mother and baby
25/07/2019	Dictaphone caused complications	Nurse reports that there were miscommunications, awkwardness or delays due to recording the PIMMS-WL session/s
26/07/2019	Did not discuss weight	Nurse reports that they did not raise the topic of weight loss and management with the mother

17/07/2019	Discusses weight	Nurse reports that they raise the topic of weight loss and management with the mother
24/07/2019	Documenting vaccine on computer	Nurse reports appropriately documenting the vaccine given
17/07/2019	Doesn't hold baby	Nurse reports that they do hold the baby during weighing the mother, and the baby is in a pram, car seat etc.
17/07/2019	Encourages mothers about WL	Nurse aims to encourage or reassure the mothers with encouraging statements, highlighting progress, or saying that they will make progress losing weight next time
17/07/2019	Explains immunisations	Nurse reports that they explain what the immunisations are for / why they're needed to the mother
17/07/2019	Feeds back on weight	Nurse reports that they feed back on mother's weight, and / or it's change from last time
17/07/2019	Gains consent to record	Nurse reports that they gain consent to record with tape recorder
17/07/2019	Holds baby	Nurse reports that they hold the baby during weighing the mother
26/07/2019	Imms before weighing	Nurse reports that they immunise the baby before weighing the mother
24/07/2019	Non-judgemental supportive attitude WL	Nurse reports a supportive, or non-judgemental, attitude and response towards weight loss (or its lack)
17/07/2019	Preparing the room and vaccines for appt	Nurse reports that they prepare the room for the appointment, ready the vaccines etc.
22/07/2019	Put mothers at ease	Nurse reports that they try to put mothers at ease while weighing her/them
17/07/2019	Recorded weight	Nurse reports that they recorded the mother's weight (on yellow card or in red book).

17/07/2019	Reframing WL as long-term healthier choices	Nurse explains to mothers that weight loss is not short-term, but longer-term healthier choices / changes
29/07/2019	Says nothing while weighing	Nurse reports that they say nothing to the mother/s while weighing her/ them
17/07/2019	Setting up tape recorder	Nurse reports that they set up tape recorder
17/07/2019	Signposts to website	Nurse reports that they signpost, or recommend the mothers to go to, the POWeR website
17/07/2019	Weighing before immunisation	Nurse reports that they weigh the mother before immunising the baby
17/07/2019	Weighs	Nurse reports that they weigh the new mother during immunisation appointments
17/07/2019	How to lose weight	
17/07/2019	Lose weight DE	When asked how pregnant women can lose weight, nurse provides answer around restricting diet in some way, or increasing exercise
17/07/2019	Lose weight SS	When asked how pregnant women can lose weight, nurse provides answer around social support e.g. family, friends, neighbours etc.
17/07/2019	Lose weight Other	When asked how pregnant women can lose weight, nurse provides answer not around diet and exercise, or social support
08/08/2019	Ideal time, space and role for WL and intervention	
26/07/2019	12 weeks after birth ideal to raise topic WL	Nurse suggests 12 weeks as the best time to raise topic of weight loss

26/07/2019	16 weeks after birth ideal to raise topic WL	Nurse suggests 16 weeks as a good time to raise topic of weight loss
26/07/2019	16 weeks after birth ideal time for intervention	Nurse suggests 16 weeks as a good time for a weight loss intervention
17/07/2019	6-8 weeks after birth ideal time to raise topic WL	Nurse suggests 6 - 8 weeks, or the 'postnatal check' as a good time to raise topic of weight loss
26/07/2019	A suitable space - mothers	Nurse reports that mother think that the baby's immunisation appointment is a suitable space / occasion to discuss mother's weight loss or have weight loss intervention
25/07/2019	A suitable space - nurse	Nurse reports that baby's immunisation appointment is a suitable space / occasion to discuss mother's weight loss or have weight loss intervention
26/07/2019	Any role ideal to raise topic WL	Nurse suggests any healthcare professional is the ideal person to raise topic of weight loss
22/07/2019	At least 8 weeks after birth ideal time for intervention	Nurse suggests at least 8 weeks as a good time for a weight loss intervention
26/07/2019	Difficult space for WL intervention	Nurse reports that baby's immunisation appointment is a difficult space / occasion to discuss mother's weight loss or have weight loss intervention
17/07/2019	Nurse ideal role to raise topic WL	Nurse suggests practice nurse is the ideal person to raise topic of weight loss
25/07/2019	Nurses' usual task / duties	Nurse views that addressing weight is one of their own usual tasks, as a nurse
26/07/2019	Timing of PIMMS-WL is fine	Nurse reports that timing of intervention (4-6 weeks after birth) is fine, acceptable, or unproblematic

17/07/2019	Uncertain about ideal time for intervention	Nurse reports being unsure about when would be the best time for a weight loss intervention after pregnancy
24/07/2019	Uncertain about ideal time to raise WL	Nurse reports being unsure about when would be the best time to raise the issue of weight loss with a new mother. (This can include pregnancy or earlier.)
30/07/2019	Weight loss companies ideal to raise topic WL	Nurse suggests that weight loss companies, such as Weight watchers or Slimming World, are the ideal people to raise topic of weight loss
17/07/2019	Identifying PIMMS-WL mothers	
17/07/2019	Email reminders	Nurse reports that they identified PIMMS-WL mothers by receiving emails in advance
26/07/2019	Informed by others	Nurse reports being informed by other staff in their practice which mothers were on PIMMS-WL
25/07/2019	Marks in computer system	Nurse reports that they record in the computer system that an appointment is PIMMS-WL to identify PIMMS-WL mothers
26/07/2019	Red sticker easy to forget	Nurse reports forgetting or it being easy to forget to check for the red sticker
17/07/2019	Red sticker not useful	Nurse reports that they don't remember seeing the red sticker, or did not find them useful to identify PIMMS-WL mothers
25/07/2019	Red sticker useful	Nurse reports that they found the red sticker useful to identify PIMMS-WL mothers
22/07/2019	Yellow card	Nurse reports that they used the yellow card to identify PIMMS-WL mothers

17/07/2019	Impact of overweight and obesity	
25/07/2019	Overweight increasing risk of depression	The nurse views that having overweight, or obesity, increases risk of new mothers developing depression
17/07/2019	Overweight increasing risk of LTC	The nurse views that having overweight, or obesity, increases risk of new mothers developing long-term health conditions
17/07/2019	Overweight reducing self-confidence	The nurse views that having overweight, or obesity, reduces self-confidence in new mothers
21/10/2019	Prevalence in community	The nurse views that this is a problem for the community as a whole.
26/07/2019	Nurses' background	
24/07/2019	Immunising for 1 - 2 years	Nurse reports that they have been giving immunisations (to patients of any age) for more than 1 year and less than 2 years
26/07/2019	Immunising for 5 - 10 years	Nurse reports that they have been giving immunisations (to patients of any age) for at least 5 years but less than 10 years
25/07/2019	Immunising for over 10 years	Nurse reports that they have been giving immunisations (to patients of any age) for over 10 years
24/07/2019	Nurse for 1 - 2 years	Nurse reports that they have been a nurse for more than 1 year and less than 2 years
26/07/2019	Nurse for 5 - 10 years	Nurse reports that they have been a nurse for at least 5 years but less than 10 years
25/07/2019	Nurse for over 10 years	Nurse reports that they have been a nurse for over 10 years
17/07/2019	Others	
17/07/2019	Belief in evidence-based medicine	Nurse show deference to, respect for, or a belief in, evidence-based health care / prior research on the issue.

17/07/2019	Nurse draws on experience as mother	Nurse refers to their personal experience as a mother in order to provide support for an argument or point
25/07/2019	PIMMS-WL having low recruitment	Participant asks about recruitment for PIMMS-WL trial, or comments that it has been low for them
17/07/2019	Parent coming to appointment	
25/07/2019	Both parents coming to appt	The nurse views that it is nearly as often, or as often, as the mother, bringing the baby to the appointment
22/07/2019	More relaxed alone	The nurse views that those who come to PIMMS-WL appointments on their own are more relaxed than those that come with another or others
17/07/2019	Mostly mums coming to appt	The nurse views that it is mostly the mothers that bring the baby to the appointment
29/07/2019	No difference alone company	The nurse views that there is no real difference in how mothers act when coming to the appointment alone or with other/s
17/07/2019	Perceived barriers and facilitators in mothers to WL	
29/07/2019	General awareness WG problem	Nurse perceives rising awareness (in community or in general) that being overweight is a problem, or important
17/07/2019	Inconsistent information	Nurse reports mothers hearing differing information surrounding weight loss and so not sure which to follow
17/07/2019	Issues with childcare - mothers	Nurses report issues for mothers with accessing / arranging / affording childcare to allow exercise
17/07/2019	Lack of time - mothers	Nurses report lack of time since having new-born, so mothers make unhealthier choices in diet and exercise e.g. fast food
02/08/2019	Mother breastfeeding facilitator WL	Nurse suggests or reports breastfeeding aids weight loss for mothers
17/07/2019	Mothers deprioritising their own HWB after baby	Nurse perceives that new mothers' priority is their baby; that they deprioritise their own health and wellbeing

17/07/2019	Mothers expect pregnancy WG	Nurses perceive that mothers expect to gain weight with pregnancy
17/07/2019	Mothers not view OW as important or problem	Nurse perceives mothers as not viewing being overweight as important, or a problem. This includes not raising the topic of weight loss
17/07/2019	Negotiating around baby	Nurse reports mothers have to negotiate around their baby, or baby's schedule, to lose weight.
17/07/2019	Overcoming resistance	Nurse reports resistance to changes in diet and / or exercise from mothers, which needs overcoming, in order for them to lose weight
31/07/2019	Perseverance	Nurse viewed weight loss programmes / techniques / or behaviour changes as requiring perseverance, which not all people with overweight possess
17/07/2019	Pregnancy myths and misconceptions	Nurse reports 'myths' or common misconceptions about weight and pregnancy, e.g. 'eating for two'
17/07/2019	Safety issues to exercise	Nurse reports issues of safety for mothers with exercising safely, especially in more socio-economically deprived areas
24/07/2019	Viewing time in appt as limited - mothers	Nurse viewed mothers viewed time in appointments as limited
17/07/2019	Potential barriers and facilitators in nurses	
17/07/2019	Concern about UK drop in immunisations	Nurse concerned about drop in immunisations in UK and that weighing mothers in these appointments will reduce immunisation rates, as women avoid getting weighed
25/07/2019	Concerned will damage relationship	Nurse concerned that mothers will respond in a negative way to raising topic of weight loss, anger, distress, mistrust etc, and damage their rapport, or working relationship in the future
17/07/2019	Lack of time to support after discuss WL	Nurses report insufficient time within immunisation slot to raise topic of weight, discuss thoroughly and / or supportively, and with sufficient support / post-care
17/07/2019	Not nurses' usual task / duty	Nurse views that addressing weight is outside of their own usual tasks, as a nurse. Not standard practice.

17/07/2019	Nurses expect pregnancy WG	Nurses expect mothers to gain weight with pregnancy, and that often this is permanent.
26/07/2019	Uncomfortable weighing mothers ad hoc	Nurse reports being uncomfortable with weighing mother outside of a set policy, rule, or conditions - doing them 'ad hoc'
26/07/2019	Uncomfortable weighing mothers as standard	Nurse reports being uncomfortable with weighing mothers as a standard policy or practice
17/07/2019	Viewing motherhood as a vulnerable time	Nurse viewing motherhood, especially for the first time, as a massive change to a person's life and therefore overwhelming, traumatic, vulnerable or sensitive time, and the mother needing protection from any additional burden or stress
17/07/2019	Viewing purpose of consultation imms / baby	Nurse perceives that the focus of the consultation is primarily about, the baby. There is little space for other concerns
17/07/2019	Viewing time in appt as limited - nurses	Nurse viewed time as limited in appointment, or as not being enough to do all the necessary tasks
17/07/2019	WL mother's responsibility	Nurse reports, or suggests, that weight loss is the responsibility of the mother
17/07/2019	Rolling out PIMMS	
17/07/2019	Logistics - IT	Nurse reports that there would be logistical issues to weigh every mother, in the area of IT, especially recording the weight
29/07/2019	Logistics - Weighing	Nurse reports that appointments would take a little longer, but PIMMS-WL could be rolled out
30/07/2019	More time but manageable	Nurse reports that appointments would be difficult as they take a little longer, due to having to weigh mother, and record (non-electronically)

26/07/2019	No issues rolling out	Nurse reports that they do not think there would be any problems rolling out PIMMS-WL
08/08/2019	Strengths of PIMMS-WL intervention	
17/07/2019	Accountability - mothers	Nurses report, or suggest, the mothers think or feel that someone other than the participant is observing and cares whether they weigh themselves or not
22/07/2019	Easy intervention	Nurse reports that they found delivering PIMMS-WL easy, or not too difficult
24/07/2019	No practical issues	Nurse reports that there were no practical issues
22/07/2019	PIMMS-WL good idea	Nurse reports that they find the idea/s behind PIMMS-WL likely to succeed, or at least good 'in theory'
17/07/2019	Prior concerns about being inundated with WL questions	Nurse was previously concerned about having to deal with a plethora of weight loss questions within the appointment. (Though are no longer)
17/07/2019	Website	
30/07/2019	Can't remember mums' opinions	Nurse reports that they cannot remember what the PIMMS-WL mothers said about the website
07/08/2019	Did not discuss website	Nurse reports that they did not discuss the website with the mother
17/07/2019	Feeling blind / ignorant about website content	Nurses viewing negatively not knowing the content of the website / wanting to see the content to better advise mothers
29/07/2019	IT literacy	Nurse reports that some mothers that could potentially be recruited, would not have sufficient literacy to reach the POWER website

29/07/2019	Mixed mothers' views POWeR	Nurse reports that some mothers viewed website negatively, and other mothers viewed positively
17/07/2019	Mothers content to be referred	Nurses report mothers have no problem, or seem happy to be referred to a website instead
17/07/2019	Mothers no time for website	Nurse reports that at least one mother did not go on website due to lack of time
25/07/2019	Mothers used website regularly	Nurse reports that mothers used website regularly
24/07/2019	Mothers view POWeR easy to use	Nurse reports that mothers viewed website as easy to use
22/07/2019	Mothers viewed POWeR useful	Nurse reports that mothers viewed website as useful
26/07/2019	Mothers viewing POWeR negatively	Nurse reports that mothers viewed website negatively
17/07/2019	Mothers viewing POWeR positively	Nurse reports that mothers viewed website positively
26/07/2019	Mums went on or not	Nurse reports that mothers did not say anything about the website beyond whether they went on it or not
25/07/2019	No mums brought up the website	Nurse reports that no mothers brought up the website
17/07/2019	Nurse finding website convenient	Nurse reports that they find referring a mother to the website rather than giving advice directly convenient

22/07/2019	Problems accessing website	Nurse reports that at least some mothers had problems accessing the website
26/07/2019	Up-to-date consistent source of info	Nurse reports that they are glad that mothers are getting correct and up-to-date information on WL through the website
26/07/2019	Would refer to NHS website anyway	Nurse reports that they would refer mothers to NHS website for weight loss advice if not on PIMMS-WL trial, so this makes little difference for them

17/07/19 - First coder NT

29/07/19 - First coder NT

31/07/19 Added 'and facilitators' to title to more accurately reflect codes in group. 17/07/19 - First coder NT

29/07/19 - First coder NT

17/07/19 - First coder NT

17/07/19 - First coder NT

17/07/19 - First coder NT

02/08/19 - First coder NT

08/08/19 - Merged with 'Mothers' focus is on baby' as same content.
17/07/19 - First coder NT

25/07/19 - Removed 'and that often this is permanent' so I could compare those that expect to lose / keep it. 17/07/19 - First coder NT
08/08/19 - Merged with 'Some unaware overweight' as similar content. 17/07/19 - First coder NT
17/07/19 - First coder NT
17/07/19 - First coder NT
31/07/19 - First coder NT
26/07/19 - Added 'and misconceptions' to title, to reflect extracts more accurately. 17/07/19 - First coder NT
17/07/19 - First coder NT
24/07/19 - First coder NT
31/07/19 Added 'and facilitators' to title to more accurately reflect codes in group. 17/07/19 - First coder NT
17/07/19 - First coder NT
25/07/19 - First coder NT
07/08/19 - Merged with 'Feeling insufficient time to support mum after discussing WL' as same content. 26/07/19 - Changed from 'Lack of time - nurses' to avoid confusion about content. 17/07/19 - First coder NT
17/07/19 - First coder NT

17/07/19 - First coder NT

26/07/19 - First coder NT

26/07/19 - First coder NT

08/08/19 - Merged with 'Protect mothers from pressure / burden' as similar content. 31/07/19 Renamed from 'Viewing motherhood as a massive change' to better reflect data extracts. 17/07/19 - First coder NT

17/07/19 - First coder NT

26/07/19 Added '- nurses' to title to distinguish between this and 'Viewing time in appt as limited - mothers'. 17/07/19 - First coder NT

17/07/19 - First coder NT

01/08/19 - Renamed from 'Issues with..' to more accurately reflect extracts. 17/07/19 - First coder NT

record' and description from 'Nurse reports that there would be logistical issues to weigh every mother, since they would have to log out of baby's record to switch to mother's record on the computer, and this would add too much time' to more accurately reflect data extracts. 17/07/19 - First

29/07/19 - First coder NT

12/08/19 - Renamed from 'More time but manageable' and added 'due to having to weigh mother, and record (non-electronically)' 30/07/19 - First coder NT

26/07/19 - First coder NT

15/08/19 - Renamed from 'Positives of PIMMS intervention' to more accurately reflect extracts and match latest draft chapter. 08/08/19 - First coder NT

08/08/19 - Recategorised from 'Others' to more relevant. 13/08/19 - Changed category from 'Others' to one more relevant. 17/07/19 - First coder NT

22/07/19 - First coder NT

08/08/19 - Recategorised from 'Experience of nurses' 24/07/19 - First coder NT
