

Safer sexting

Think before you send:

Why are you doing this? Is it really for you or for them? If they care about you they won't want you to do it under pressure. 🙄

Have you had a bit to drink? It might not seem like such a good idea after you've sobered up.

Would you be happy to show this pic to your granny? Will you mind if this gets sent round the rest of the year? 🤔

If you decide to send, keep your face out of it and make sure there's nothing in the pic that could identify you, like your bedroom wall.
