SSHeW Study

Stopping Slips among Healthcare Workers (SSHeW)

A randomised study of slip resistant shoes to prevent slips among healthcare workers.

FINAL QUESTIONNAIRE Control participants

Thank you for agreeing to take part in this study.

The footwear in this study has been found to be slip resistant when tested using the Health and Safety Executive Grip rating scheme. The responses you give in this questionnaire will help us find out if wearing this footwear can prevent slips when in the workplace.

PLEASE READ ALL INSTRUCTIONS BEFORE COMPLETING THIS QUESTIONNAIRE

Please answer ALL the questions. In this study we want to learn about how many slips however minor, people experience during their working day, and whether or not these slips result in falls and/or injuries. In this study a slip is defined as a loss of traction of your foot on the floor surface, which may or may not result in a fall. A fall is defined as an unexpected event in which you come to rest on the ground, floor, or lower level.

If you find it difficult to answer any question, please give the best answer you can. You may find your study diary helpful when completing these questions.

Please follow the instructions for each section carefully.

For each section, if you are asked to put a cross in the box, please use a cross rather than a tick, as if you were filling out a ballot paper.

No

For example in the following question, if your answer to the question is 'yes', you should place a cross firmly in the box next to yes.

Do you drive a car? Yes

If you are asked to write your answer, please do so by entering your answer in the boxes provided, for example:

How old are you? 3 1 years

Please use a **black or blue** pen for all the questions.

Please do not use a pencil or any other coloured pen. If you make a mistake then please cross out the incorrect entry, by placing a single line through the words or numbers, and write the correct information to the side. For example DOB 12/03/1980 12/03/1989.

If you have any queries or problems completing this questionnaire please contact the trial co-ordinator, **and the second se**
